

Colour coded Tank Brushes

- Foodgrade
- Available in 10 colours
- Polyester PBT Bristles – most effective hygiene bristle
- Extremely durable and wear resistant

AUK. Only from **foodcare**®

Colour coded Tank brushes

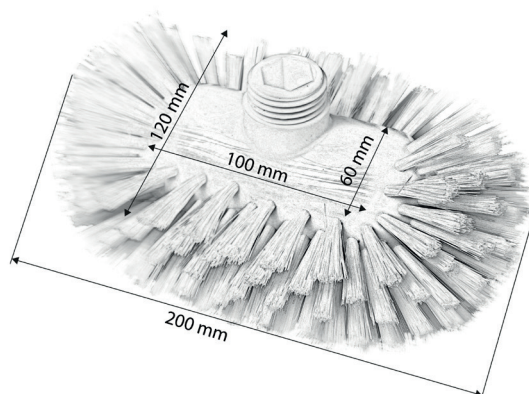

Technical Specifications

Material	
Block/Body:	Polypropylene
Bristles:	Polyester PBT
Heat tolerance:	134 degrees celsius
Suitable for autoclave	
Chemical resistance	The brushware has excellent resistance to the following chemicals: <ul style="list-style-type: none">• Bleaching Solutions Dilute• Citric Acid• Detergent• Hydrochloric Acid

It is recommended to clean, disinfect and/or sterilise the article before use.

How to choose your bristle type:

- **Flagged-Soft** – These are soft bristles that have been split to make an ultrafine, almost ‘fluffy’ end on the bristles. Use for fine powder & dust, also on uneven and rough surfaces to get into all the crevices. Note: Flagged bristles tend to clog when there is dust & moisture, combined.
- **Medium** – These bristles are very flexible, and still soft, and will do a very good job with dust and powder, as well as being more resistant to moisture. Very easy to push, and still gets into crevices.
- **Medium-stiff** – Still flexible, but with more rigidity for bulkier and more solid product. Will not pick up fine dust as well, use for meat scraps, fruit skins, pulp, grains etc.
- **Extra-Stiff Bristles** – These bristles will shift bulk product, they make great yard brooms ... they will last. Great for abattoirs, wineries, anywhere you need to shift lumpy, heavy, sloppy or wet product.

Approvals

All raw materials are in compliance with FDA-CFR 21 / Food code 2009. European Brushware Federation (FEIBP) reg no. DK-401

Manufacturing Specifications

Made in accordance with EU regulations; 10/2011/EC, 1935/2004/EC, 2023/2006, 579/2011/EC. EU directive; 93/43/EEC
