

Retreeva Metal Detectable Pens

- Metal detectable
- Durable moulded ergonomic body
- With Lanyard Loop and optional Pocket Clip
- Fully retained refill
- Secure dependable click action

Retreeva Metal Detectable Pens

Technical Specifications

Maximum detectability:	Metal and x-ray detectable pens moulded from FDA food contact approved blue, red, yellow or green material.
Positive retracting mechanism:	Cartridge will not jump out of position regardless of pressure exerted on writing point.
Highly visible ink indicators:	Dominant top button and large window identify ink cartridge colour.
Strong pocket clip:	Designed as virtually unbreakable.
Unique cartridge suspension:	Provides firm writing experience without the need for a metal spring.
Smooth finish:	Comfortable to hold, retains grip, easy to clean.
Contoured for thumb and finger:	Textured surface for enhanced grip without compromising hygiene.
Large lanyard loop:	Intended for a real lanyard, not just a thread.
Safe under duress:	Moulded from shatter resistant polymers to avoid splintering if crushed.
Long writing life:	Superior quality European ink cartridge with Tungsten Carbide ball for anti-abrasion, smooth, consistent ink flow. More than 10 km of writing length!

Choosing the correct ink for your application.

- **Regular Ink:** Only the best ink cartridges with Tungsten Carbide tips are selected to provide clean and even delivery over a long writing life.
- **Gel Ink:** Providing that extra touch in positively smooth writing. Proven to perform well on difficult surfaces and at lower temperatures. Preferred option in fridge & freezer or dusty environments.

Food safety and detectability report

- ✓ Detachable metal spring-NONE
- ✓ QC Check
- ✓ Visual Compliance
- ✓ Housing and insert suitable for Food Contact
- ✓ Housing and insert compliance with REACH SVHC
 - X-ray (much contrast): Very high
 - X-ray (less contrast): Very high
 - Metal (dry products): Very high
 - Metal (wet products): High
