

# Colour coded sweepers

- World's best sweepers
- Foodgrade
- Available in 10 colours
- Polyester PBT Bristles – most effective hygiene bristle
- Extremely durable and wear resistant

AUK. Only from **foodcare**<sup>®</sup>

# Colour coded sweepers

## Technical Specifications

Material	
Block/Body:	Polypropylene
Bristles:	Polyester PBT
Heat tolerance:	134 degrees celsius
Suitable for autoclave	
Chemical resistance	The brushware has excellent resistance to the following chemicals: <ul style="list-style-type: none"> <li>• Bleaching Solutions Dilute</li> <li>• Citric Acid</li> <li>• Detergent</li> <li>• Hydrochloric Acid</li> </ul>

It is recommended to clean, disinfect and/or sterilise the article before use.

### How to choose your bristle type:

- **Flagged-Soft** – These are soft bristles that have been split to make an ultrafine, almost ‘fluffy’ end on the bristles. Use for fine powder & dust, also on uneven and rough surfaces to get into all the crevices. Note: Flagged bristles tend to clog when there is dust & moisture, combined.
- **Medium** – These bristles are very flexible, and still soft, and will do a very good job with dust and powder, as well as being more resistant to moisture. Very easy to push, and still gets into crevices.
- **Medium-stiff** – Still flexible, but with more rigidity for bulkier and more solid product. Will not pick up fine dust as well, use for meat scraps, fruit skins, pulp, grains etc.
- **Extra-Stiff Bristles** – These bristles will shift bulk product, they make great yard brooms ... they will last. Great for abattoirs, wineries, anywhere you need to shift lumpy, heavy, sloppy or wet product.

## Approvals

All raw materials are in compliance with FDA-CFR 21 / Food code 2009. European Brushware Federation (FEIBP) reg no. DK-401

## Manufacturing Specifications

Made in accordance with EU regulations; 10/2011/EC, 1935/2004/EC, 2023/2006, 579/2011/EC. EU directive; 93/43/EEC.1
